Summary

Senior software engineer on Shiny, Posit's web framework for R and Python (1M+ monthly downloads). 2,000+ merged pull requests across 160+ GitHub repositories since 2018. Current work: OpenTelemetry for Shiny, LLM-powered apps, and React-based custom UI. PhD in Statistics from Purdue University, focused on large data visualization.

Experience

Senior Software Engineer, Posit · Remote Jan 2022 – Present

- Core developer of Shiny for Python (200K+ monthly downloads), a framework for interactive web apps.
- Architected Playwright testing controllers for every Shiny for Python UI component. Cut 7+ hours of CI compute to a 4.5-minute run by spreading 1000+ pytest tests across 170 parallel jobs (5 Python versions × 3 browsers).
- Built shinylive for R and Python, which export Shiny apps to static sites that run in the browser with WebAssembly.
- Added OpenTelemetry support; built LLM-powered apps (querychat, shinychat) and React-based UI (shinyreact).

Software Engineer, RStudio (now Posit) · Remote Jan 2018 – Dec 2021

- Core developer of Shiny, an R package for building interactive web apps in R.
- Architected and automated nightly testing of 150+ Shiny apps with GitHub Actions on Mac, Windows, and Linux across 5 R versions (shinycoreci).
- Converted Shiny's core JavaScript to TypeScript.
- Maintained plumber (R web APIs), reactlog (reactivity visualizer), shinytest2, and dozens of packages in the Shiny ecosystem.

Tool Development Team, Gates Foundation: HBGDKi · Remote Apr 2016 – Dec 2018

- Produced custom summary statistics for 75+ datasets to feed visualization apps.

Researcher, DARPA XDATA and D3M grants, Purdue University · West Lafayette, IN Sep 2016 – Dec 2017

- Worked remotely with Hafen Consulting, Kitware, and KnowledgeVis on a web interface for subject matter experts to explore machine learning pipelines.

Software Engineer, Metamarkets · San Francisco, CA Jan 2011 – Jul 2012

- Built interactive D3 visualizations on DVL, a reactive data visualization library, in CoffeeScript.

Open source software

2,300+ merged pull requests across 160+ GitHub repositories since 2018. Top packages I maintain or author:

[shiny](#) A web application framework for R and Python · [R](#), [TypeScript](#) · [Python](#)

[shinyreact](#) Client-Side 'React' Interface for 'shiny' · [R](#), [Python](#), [TypeScript](#)

[shinytest2](#) Testing for Shiny Applications · [R](#)

[plumber](#) An API Generator for R · [R](#)

[learnr](#) Interactive Tutorials for R · [R](#)

[promises](#) Abstractions for Promise-Based Asynchronous Programming · [R](#)

[GGally](#) Extension to 'ggplot2' · [R](#)

Education

PhD, Statistics, Purdue University · West Lafayette, IN 2013 – 2017

BS, Computer Engineering, Iowa State University · Ames, IA 2006 – 2010

Talks, awards & teaching

44 talks & workshops, 11 videos, and 25 blog posts, listed at [schloerke.com](#)

[National Science Foundation Graduate Research Fellowship](#) 2012 – 2017

[Google Summer of Code](#), [GGally::ggduo](#) 2016

Internship Mentor, Posit · Samuel Bharti: a [bioinformatics Shiny showcase](#), 10 Shiny apps built on 5 packages 2026

Skills

Languages	R, Python, TypeScript, JavaScript, HTML, CSS, SQL, Bash
Frameworks	Shiny (R and Python), React, plumber, htmltools, ggplot2, tidyverse
Testing & CI	Playwright, pytest, testthat, shinytest2, GitHub Actions
Publishing	CRAN, PyPI, npm, conda-forge, pkgdown, Quarto, GitHub Pages
